Startup Web App

VideoRegisterXMLHTTP

1. HTML5 Video Embedding

The HTML5 <video> tag is the standard way to embed videos into webpages.

▶ 0:00

2. Secure Registration Form (POST)

The form below uses the POST method to securely send user data.

Full Name

3. Semantic Navigation

The navigation bar at the top is created using the semantic `<nav>` element. Semantic HTML improves SEO, accessibility, and webpage structure.

4. Correct XML Syntax

```
<note>  
  <to>User</to>  
  <from>Admin</from>  
</note>
```

Every opening tag has a matching closing tag, making the XML document well formed.
